

Need a crown?

See how the **One Visit Crown** can give you a reason to smile again.

The high cost of a lab crown can be painful, however a weak, untreated tooth can be a ticking time bomb, just waiting to crack - ouch! When it cracks it can lead to severe pain, an expensive root canal treatment, or the tooth may even split in half.

Save yourself time, money and unnecessary pain with a crown that can be completed in **only one appointment**. The One Visit Crown is the ideal solution for:

Root canal treated teeth

Amalgam/Large filling replacements

Crowns/cracked teeth

Ask your dentist today if a One Visit Crown is right for you.
