One Visit Crown

Natural looking, tooth coloured crowns - to make your tooth strong again.

Times have changed. You no longer need to struggle to fit multiple dentist appointments into your busy schedule. Nor do you need to break the bank when deciding to get a dental crown.

So you need a dental crown - what are your options?

	Cost	Durability	# of visits	Non invasive
Large filling	👛	★	1	✓
OVC	👛👛👛	★ ★ ★	1	✓
CAD/CAM	👛👛👛👛	★ ★ ★	1 (long)	✗
Lab Crown	👛👛👛	★ ★ ★	2	✗

When is a crown required?

Heavily filled, weak or cracked teeth. Large fillings fill the void but don't reinforce the healthy tooth structure. Cracks can spread from the corners which can lead to cusp breakage.

Severely decayed teeth. If your nerve is still alive, the priority is to protect it from further injury and exposure. If the nerve dies, you are likely to develop a serious toothache and abscess.

Root filled with little remaining tooth. After you get a root canal treatment it is vital to protect your tooth from breakage and reinfection.

Why the One Visit Crown is right for you:

- ✓ **Easier to fit into your schedule.** Your dentist can prepare and place an OVC in just one appointment. You won't need to wait hours for your crown to be milled, or weeks for it to come back from the lab.
- ✓ **You can afford to take care of your teeth.** Good news! The OVC procedure is faster and more efficient than a traditional crown, making it a more affordable dental crown solution. This means you no longer need to delay giving your teeth the treatment they need. The cost of the OVC does vary from dentist to dentist.
- ✓ **Save more of your natural tooth.** The OVC is conservative by nature, requiring less drilling and reduction of your tooth.
- ✓ **Goodbye metal mouth.** Now you can restore your teeth with natural looking, tooth-coloured dental crowns. The OVC is available in different shades to match closely to your own teeth.
- ✓ **Peace of mind from day one.** Temporary crowns are designed to be easy to remove by the dentist and are held on with a very weak glue. It can be annoying if they come off. With the OVC you don't need a temporary crown at all. The OVC is fitted to your tooth on the same day, in the same appointment.
